**SLAMP:**  
THE LEADING LIGHT

# unveil and reveal

Morning light reveals all that surrounds us, and the rosy fingers of sunrise open our eyes to the beauty of all that darkness covered the night before. For Slamp, the act of turning on a light marks and bears witness to the miracle of each returning day. What seems to be something so simple actually unveils and reveals the most precious things in the universe: ourselves and the things surrounding us. Slamp's newest collections are inspired by the precise moment when we, mere fragments, are ready to be satiated by the world. The elegant, delicate, yet powerful tones of a sunrise gave us the creative energy to shape these magnificent collections, that when illuminated, remind us that beauty will save the world.

La Luce ogni mattina ci rivela il tutto intorno a noi, l'alba tocca con le sue dita rosate i nostri occhi, ricordandoci la bellezza che la notte ha celato. L'atto di accendere la Luce, per Slamp, è memoria e testimonianza di un miracolo che ogni giorno si ripete. Un gesto apparentemente banale che svela e rivela quanto l'universo ha di più caro: noi e le cose che ci circondano. Le nuove collezioni di Slamp sono ispirate proprio a quel momento, in cui noi siamo pronti a riempirci del mondo, esserne un piccolo frammento. I colori dell'Alba ci hanno dato la delicatezza, l'eleganza e allo stesso tempo la forza creatrice per sviluppare queste magnifiche collezioni che ad ogni accensione ci ricordano che la bellezza salverà il mondo.

# SLAMP

## THE LEADING LIGHT

unveil the  
unique —

Every Stamp lamp is unique. Unique because it does not originate from a 3D file; the creative process requires a designer to get their hands dirty as they cut, "sew", and sculpt materials, applying years of concrete and studious research and development. Unique because the ladies who "tailor light" don their white gloves and proudly bring a poetically original piece to life. Unique because a lamp is the pure expression of the person who selected it, reflecting their aesthetic identity, those who leave light as the only vibration on a silent evening, unwittingly reigniting the energy of an artistic creation with a single click.

Ogni lampada Stamp è unica. Unica perché frutto di un processo creativo che non origina da un file 3d, ma che richiede al progettista la volontà di "sporcarsi le mani", tagliando, cucendo e trattando materiali e valori sedimentati in anni di studio, ricerca e innovazione. Unica perché allestita in un Atelier dove ogni giorno le Sarte della Luce, indossati i loro guanti bianchi, sono orgogliose di mettere al mondo un capo che si distingue per poetica e originalità. Unica perché espressione di chi ama raccontare la propria identità attraverso gli oggetti che lo circondano; di chi lascia che la silenziosa presenza della luce si trasformi nella migliore colonna sonora di una sera; di chi ogni giorno con un click sull'interruttore riaccende, inconsapevolmente, tutta l'energia della creazione.

# THE IMMEDIACY OF A SYMBOLIC LANGUAGE IS FOUND THROUGHOUT THE UNIVERSE

La Vie was inspired by the Flower of Life, equal to harmonious energy, a symbol of birth and beginnings, that vibrates life's frequencies. It is a three dimensional representation of all the materials in the universe.  
Ispirata alla celebre simbologia del Fiore della Vita, La Vie è sinonimo di energia e armonia, è simbolo di inizio e di nascita, racchiude le frequenze della vita. È la raffigurazione tridimensionale di tutte le configurazioni che la materia che compone l'universo può avere.

## RICHLY ILLUMINATE CORRIDORS AND MORE

La nuova LaFleur applique, grazie al suo diffusore modellato a mano, garantisce effetti di luce unici e suggestivi sulla parete in cui è installata, valorizzando angoli della casa come corridoi e ingressi.

The new LaFleur applique has a hand-crafted bloom that casts suggestive, unique plays of light on the surface behind it, making the blossom perfect for corridors and entryways.

The stem is made of dual painted copper wires, designed to bend perfectly under the blossom.

Lo stelo, composto da 2 cavi in rame smaltato, segue la curva studiata dal designer, per conferire alla corolla diffusore l'inclinazione perfetta.

# from lamps to beehives—

## SLAMP'S SUSTAINABLE PROJECT

The quality of Slamp's materials and their sustainable approach to working with them has set the company apart since 1994. Their resistant, long-lasting technopolymers not only exhibit optimal thermal, electrical, and chemical properties, but these unique materials are recyclable. The manufacturing processes have a low impact on the environment: the lamps' technopolymer sheets undergo cold cutting before being constructed by hand. The small amount of extra cuttings are recycled monthly, and since the beginning of 2020, a portion of those are being made into beehives for bumblebees by DS-Group. Bumblebees, part of the Apidae family, are widely used in pollinating fruit trees (replacing toxic chemicals). They are used for tomatoes as well, and ensure quality, juicy crops. Slamp applied the same approach to their headquarters, inaugurated September 8, 2019. High priority was placed on architectural decisions, including isolating thermal materials and large windows facing the production lines to reduce the use of artificial light. The hub's energy comes from predominantly renewable sources.

Per le qualità intrinseche dei materiali che impiega, e per le tecniche di lavorazione che utilizza, Slamp è un'azienda a basso impatto ambientale sin dal 1994. I tecnopolimeri, resistenti e durevoli, sono dotati di ottime proprietà termiche, elettriche e chimiche, e – soprattutto – sono riciclabili. I pochi sfridi di lavorazione generati durante la produzione vengono riciclati da sempre ma, dal 2020, parte di essi viene utilizzata anche per la produzione di componenti di arnie per i Bombi. Questa particolare tipologia di imenotteri è fondamentale per la tutela della biodiversità e permette l'impollinazione naturale di piante da frutto e ortaggi in alternativa a prodotti chimici altamente tossici. L'attenzione e la cura dell'ambiente hanno influito anche sull'architettura della sede di Slamp inaugurata nel 2019 alle porte di Roma: parte dell'energia assorbita dall'impianto produttivo arriva da fonti rinnovabili, l'hub produttivo è stato realizzato utilizzando materiali altamente isolanti e gli ampi lucernari sulle linee di allestimento riducono il consumo di luce artificiale.

**HANDMADE IN ITALY**

ALL SLAMP PRODUCTS ARE PRODUCED AND ASSEMBLED IN ITALY

Tutte le lampade Slamp sono conformi alla Normativa RAEE  
All Slamp lamps are RAEE Standards compliant

The company suggests this lightbulb wattage for an optimal balance of illumination and aesthetic output per product, as well as bulb size: E27: Ø6 cm (2,34") E14: Ø4,5cm. (1,75"). Higher wattage can be used as long as the bulb is exclusively LED and matches the required size.

Il wattaggio delle lampadine sul seguente catalogo è suggerito dall'azienda per un ottimale balance fra resa luminosa ed estetica del prodotto oltre che alla dimensione del bulbo E27: Ø6 cm - E14: Ø4,5cm. Possono essere utilizzati wattaggi superiori purchè si utilizzino esclusivamente lampadine LED con una dimensione del bulbo adeguata.

Products are patented throughout the world and conform to the leading electrical safety standards. For any further info please ask your Slamp representative.
